	AUGUST	Ch-7: Weather,			

Climate and Adaptations of Animals to Climate(Rationalised)

- *Weather Climate and Adaptation
- *Elements of Weather
- *Adaptaion in Polar region and tropical rainforests
- *Analysis of weather
- *Adaptation of polar bear,
- *Migratory bird

- *Recalls the different types of habitats, defines weather, climate and adaptation
- *Distinguish between weather and climate
- *Explains the different adaptations of animal
- *Analyses the weather of a place determined by the presence of sun
- *Evaluate the role of various organisms in the various habitats

- *Observe weather data for a week by including the elements of weather
- *Compare the climatic information of Srinagar and Thiruvanantha puram; Assam and Rajastan
- *Plot the Polar regions and Tropical rainforest regions ,in a world map

Ch-8: Wind, Storms and Cyclones(Rationalized)

- *Air Exerts Pressure
- *Air Expands on Heating
- *Thunderstorms

and Cyclones
*How a
thunderstorm
becomes a
cyclone
*Effective Safety
Measures against
Cyclones
*Thunderstorms

**Ch-9:
Soil(Rationalized)**

*Soil Teeming
with life
*Soil profile
*Soil type
*Properties of Soil
*Absorption of
water by soil
soil and crop

*Recalls details
pertaining to air &
effects of air pressure.
*Demonstrate an
experiment in order to
conclude that air
expands on heating.
*Differentiate cyclone,
thunderstrom and
tornados
*Analyses the possible
reasons for cyclones in
some regions
*Suggests precautions
against Cyclones,
Thunderstorms &
Tornadoes
*Recalls the different
components of soil

*Classify soil into

*Blowing paperball
into the bottle
*Blowing air
between the
balloons
*Observing the
shape of balloon in
hot and cold water
*To prove air
expands on heating
and hot air rises up
*Make your own
anaemometer

*Examine the soil

				<p>different categories based on its properties</p> <ul style="list-style-type: none"> *Describe all the layers in the soil profile *Examine different soil samples in order to infer moisture content and percolation rate *Explains the effects of soil pollution on life on earth. *Predict the consequences of absence of soil on life on earth and suggests precautions 	<p>profile</p> <ul style="list-style-type: none"> *Collecting different soil types to check the percolation 	
	<p>PT2 in Sep Max M: 80 (Weightage 80 m)</p>	SEPTEMBER	Revision			<p>30 + 20 = 50% Of Annual Syllabus</p>
TERM-2		OCTOBER	<p>Ch 10: Respiration in Organisms</p> <ul style="list-style-type: none"> *Why do we respire? *The process of breathing 	<ul style="list-style-type: none"> *Understand respiration as breakdown of food for energy *Differentiate aerobic and anaerobic respiration *Illustrate the respiratory system with 	<ul style="list-style-type: none"> *Compare the breathing rate of self, parents, children and old people *Anulom Vilom Yoga *Make model to 	

			<p>*Breathing in other animals *Do plants also respire?</p> <p>Ch 11: Transportation in Animals and Plants</p> <p>*Circulation *Blood, Blood vessels and heart *Heartbeat *Excretory system in humans *Transport of substances in plants *Transport of water and minerals</p>	<p>labeling *Compare respiration and breathing *Analysis the position of diaphragm during inhalation and exhalation</p> <p>*Discuss the importance of transportation in organisms *List the components of Circulatory system *Diagrammatic representation of heart *Analysis the role of heart in blood circulation *Discuss the role of excretory system in transportation *Evaluate the role of artificial kidney in blood filtration</p>	<p>show mechanism of breathing *To check the effect of exhaled air on lime water *Collect and share information about *Artificial respiration</p> <p>* To check the pulse rate of children and adults and compare *Model of a stethoscope *Find out the blood groups and their importance *Potato activity to show transportation of water through cells *Collect and share information about ECG and Dialysis *Activity for transpiration</p>	
OCTOBER TO		NOVEMBER	Ch 12:			

MARCH

Reproduction In Plants

- *Modes of reproduction
- *Asexual reproduction- Vegetative propagation, budding, fragmentation, Spore formation
- *Vegetative propagation from leaf, stem and root
- *Pollination
- *Fertilization
- *Fruit and seed formation
- *Seed dispersal

Ch 13: Motion and time

- *Slow or fast
- *Speed
- *Measurement of time
- *Units of time and speed
- *Measuring speed

- *Define reproduction
- *Distinguish asexual and sexual reproduction
- *List the modes of asexual reproduction
- *Analysis the role of vegetative parts of a plant in reproduction
- *Classify asexual reproduction into different types
- *List examples for the types of asexual reproduction
- *Examine the role of flower in reproduction
- *Compare self and cross pollination
- *Evaluate the concept of seed dispersal in plant reproduction

- *Recall the types of motion
- *Define speed and demonstrate time period on simple pendulum

- *Observe vegetative propagation in potato, carrot, bryophyllum etc
- *Examine the parts of flower and understand the importance of them
- *Specimen of different types of seeds to study seed dispersal

- *Calculate the time period of a simple pendulum
- *Calculating speed of animals in Table 13.4
- *Plot a distance-

*Distance-time graph

*Compare uniform and non uniform motion understand the relation between speed, distance and time
*Solve numericals on speed
*Analyse distance and time graph
*Learn to plot a bar graph and line graph

time graph of an object moving with Uniform and Non uniform speed
Model of a sand clock

Ch 14: Electric current and its effects

*Symbols of electric components
*Open and closed circuit, circuit diagram
*Heating, lighting, Magnetic effects of electric current
*Electromagnets

*List the uses of electricity in daily life
*Draw the symbols of electricity
*Demonstrate the flow of current through a circuit
*Schematic representation of circuit using symbols of battery, wire, switch and bulb
*Differentiate between open and close circuit
*Analysis the two effects of current: heat and magnetic

Make an electric circuit

	<p>PT-3 in Dec Max M: 40 (Weightage 5m)</p>	<p>DECEMBER</p>	<p>Ch 15: Light</p> <ul style="list-style-type: none"> *Properties of light *Plain Mirror and Spherical mirror, images formed by these mirrors *Uses of plane and spherical mirror *Concave and convex lens, images formed by these lens *Uses of concave and convex lens *Dispersion of white light using prism 	<ul style="list-style-type: none"> *Recall light as a form of energy and its uses in daily life *Examine that light travels in a straight line *Demonstrate image formation by using candle and mirror *Introduce the terms image, object and light source *Explain the concept of reflection by citing relevant examples *Introduce the concept of lateral inversion by giving real life examples *Explain the two types of mirrors: concave and convex *Demonstrate the image formation in concave and convex mirrors and identify the 	<ul style="list-style-type: none"> *Light travels in a straight line *Locating image in a plane mirror *Image formation in a spoon *Paper burning activity by capturing image of sun *Images formed by a concave and convex mirror *Newton's disc *Refraction through prism 	<p>PT3-30% of Term 2 (Oct to Nov syllabus)</p>
--	---	-----------------	---	--	--	---

			<p>properties of the image formed</p> <ul style="list-style-type: none"> *Illustrate with an activity that white light is made of seven colors using a prism *Construction of a colour wheel 	
		<p>Ch 16: Water: A precious resource(Rationalized)</p> <ul style="list-style-type: none"> *Availability of water and its distribution *Forms of water, water cycle, source of water *Depletion of water table *Water Management *Effects of water scarcity on plants 	<ul style="list-style-type: none"> *Recall the significance of water and its role in life sustenance *Explain the quantity of potable water left for usage *Evaluate the forms of water and it's usage *State the importance of ground water to mankind *List the reason for depletion of water table and ways to conserve it *Formulate a method to conserve water which is a need of the hour 	<ul style="list-style-type: none"> *Collect information about water requirement for students of each class *Study the effect of water scarcity on plants *Implement water conservation at school and house
	JANUARY	<p>Ch 17: Forests : Our lifeline</p>	<ul style="list-style-type: none"> *Recollect the uses of forests *Analysis the structure 	<ul style="list-style-type: none"> *Collect pictures of different types of trees

*Diversity in Forest flora and fauna
*Types of canopy in forest plants
*Plants and their products
*Food chain - interrelation between various organisms
*Effects of deforestation

Ch 18: Waste water story

*Water our life line- its uses
*Waste water
*Waste water treatment plant
*Sanitation and Disease
*Better housing practices, sewage disposal and sanitation at public places

of a forest
*List the flora and fauna present in forests
*Value forest as a treasure of natural resources
*Appreciate forest as the main contributor of rainwater
*Develop ways to improve and save forest from depletion

*Recall the significance of water to all living organisms
*List the different ways for waste generation
*Examine the effects of waste water on health of living organisms
*Explain the role of treatment plants in sewage treatment before disposal
*Discuss the sanitation methods to reduce pollution of water
*Create new ways of waste disposal to diminish waste generation

*Write few uses of the products obtained from forests
*Plant a sapling on any important day

*Multi- layer filtration of muddy water
*Collect pictures of diseases caused due to poor sanitation
*To segregate wet and dry waste separately

		FEBRUARY	REVISION		REVISION
	ANNUAL EXAMINATION in March Max M: 80 (Weightage 80 m)	MARCH	ANNUAL EXAM		ANNUAL EXAM
					20% of Term 1 + The entire syllabus of Term 2

Rationalized
chapters be
taught through
activities. Not to
be tested.

BIFURCATION OF SYLLABUS(2023-24)
SUBJECT: MATHEMATICS
CLASS: VII

TEXT BOOK -NCERT MATHEMATICS

TERM I	ASSESSMENT	MONTH	WORKING DAYS	CHAPTER	SUB TOPICS	LEARNING OBJECTIVES	ACTIVITY	SYLLABUS COVERAGE
APRIL TO SEPTEMBER	PT-1 Max M:40 (Weightage 5 m)	April	15	1. INTEGERS	<ul style="list-style-type: none"> ➤ Recall number system ➤ Positive and negative numbers ➤ Addition, subtraction, multiplication and division of integers ➤ Properties ➤ Closure ➤ Commutative ➤ Associative Distributive 	<ul style="list-style-type: none"> ➤ Recall integers in order to differentiate between whole numbers and integers ➤ Represent integers on a number line and perform operations and verify properties of integers. ➤ Apply properties of addition, subtraction and multiplication of integers and devise methods for easier calculation and solve problems based on real life related to integers. ➤ Apply properties of division of integers and ➤ simplify arithmetic expressions. 	To demonstrate multiplication of integers using number line.	30% of Term-1.
		May/June	15	2. FRACTIONS AND DECIMALS	<ul style="list-style-type: none"> ➤ Define fraction ➤ Addition, subtraction, Multiplication, Division of fractions and decimals ➤ Place value table of decimals Decimal conversions 	<ul style="list-style-type: none"> ➤ Define proper, improper and mixed fractions in order to distinguish between them. Convert unlike fractions into like fractions in order to compare them. ➤ Multiply fractions in order to compare the value of the product with the original fractions. ➤ Divide two fractions in order to find the smaller parts of the fraction. ➤ Recall and apply concept of decimal representation and expansion in order to perform mathematical operations on decimal. ➤ Convert decimals into fractions in order to divide decimal number by another decimal number 	To derive the rule of finding product of two fractions using paper folding method.	

		July	23	3. Understanding Quadrilaterals <ul style="list-style-type: none"> ➤ Definition of data ➤ Range ➤ Measure of central tendency ➤ Mean ➤ Median ➤ Mode ➤ Reading bar graph ➤ Construction of double bar graph ➤ Probability 	<ul style="list-style-type: none"> ➤ Collect, record and present data in order to organize experiences and draw inferences from them. Organize raw data into tabular form in order to make data easier to interpret. ➤ Calculate arithmetic mean in order to find its position in the data. Calculate mode of the data in order to find the observation that occurs most often in the data set. ➤ Calculate median of the data in order to find the observation that lies in the middle of the data set. ➤ Represent data in a bar graph using appropriate scale in order to represent given information in form of a bar graph. Represent data using double bar graph in order to compare and discuss two collections of data at a glance. 	To collect two sets of data, represent this through a double bar graph and interpret it.	
				August	24	4. SIMPLE EQUATION <ul style="list-style-type: none"> ➤ Setting up an equation ➤ Solving an equation ➤ Solution of an equation ➤ Applications of simple equations 	<ul style="list-style-type: none"> ➤ Use number and variable with different operations in order to express a real life situation in the form of a simple linear equation. ➤ Use trial and error method in order to determine the solution of a simple equation. ➤ Explain the first step to be taken in order to separate the variable while solving the given equation. Use the given solution in order to construct equations from it. ➤ Construct simple equations in order to solve them for the given contextual problems/puzzle
						5. LINES AND ANGLES <ul style="list-style-type: none"> ➤ Complementary angles ➤ Supplementary angles ➤ Adjacent angles ➤ Linear pair 	<ul style="list-style-type: none"> ➤ Recall the concept of line, line segment and angles in order to identify them in the given figure(s). ➤ Examine different angles in order to identify complementary angles. Examine different angles in order to identify supplementary angles. ➤ Examine different angles in order to determine the measure

					<ul style="list-style-type: none"> ➤ Vertically opposite angles ➤ Transversal Angles made by a transversal 	<p>of their complement and supplement.</p> <ul style="list-style-type: none"> ➤ Describe adjacent angles in order to identify a pair of adjacent angles in the given angles. ➤ Examine different angles in order to identify linear pair. ➤ Describe vertically opposite angles and their property in order to identify them in the given figure. ➤ Identify different types of angles in order to determine the measure of unknown angles in the given figure. ➤ Discuss the different angles made by a transversal and intersecting lines in order to identify them in the given figure. Use the properties of angles made by a transversal of parallel lines in order to determine the measure of unknown angles. 		
				<p>6. THE TRIANGLE AND ITS PROPERTIES</p> <ul style="list-style-type: none"> ➤ Median ➤ Altitudes ➤ Angle sum property ➤ Exterior angle property ➤ Triangle inequality Pythagoras theorem 	<ul style="list-style-type: none"> ➤ Compare different triangles in order to classify them on the basis of their sides and angles. ➤ Recall the parts of a triangle in order to describe it for the given triangle. Describe median and altitude of a triangle in order to identify it for the given triangle. ➤ Apply the exterior angle property of a triangle in order to find the measure of the unknown angle in the given triangle. ➤ Apply the angle sum property of a triangle in order to find the measure of unknown angle. ➤ Apply the property of lengths of sides of a triangle in order to determine whether a triangle is possible for the given side lengths or not. ➤ Apply the Pythagoras property in order to verify whether the 	To verify the angle sum property of a triangle.		

						<p>triangle for the given sidelengths will be right angled triangle or not.</p> <ul style="list-style-type: none"> ➤ Apply the Pythagoras property in order to find the length of the unknown side in a right-angled triangle 		
	<p>PT-2</p> <p>Max M:80</p> <p>(Weightage 80 m)</p>	<p>September</p>	<p>22</p>	<p>7. CONGRUENCE OF TRIANGLES</p>	<ul style="list-style-type: none"> ➤ Congruency of plane figures ➤ Congruent line segments ➤ Congruent angles ➤ Congruence of triangles ➤ SSS ➤ SAS ➤ ASA ➤ RHS Criteria 	<ul style="list-style-type: none"> ➤ Experiment superposition of different lengths in order to understand congruence of two line segments and vice versa. ➤ Use SSS, SAS, ASA, RHS Congruence criterion in order to examine whether the given triangles are congruent or not. 		<p>30+20=50% of Annual Syllabus</p>
				<p>8. COMPARING QUANTITIES</p>	<ul style="list-style-type: none"> ➤ Comparing by division ratio ➤ Percentage ➤ Application of percentages to profit and loss Simple interest 	<ul style="list-style-type: none"> ➤ Convert ratios into like fractions and compare them in order to identify equivalent ratios. ➤ Represent equal ratios in proportion in order to find missing term(s). ➤ Convert denominators of fractions into 100 in order to represent them in percentages. ➤ Convert fractional numbers to percentage in order to make comparing of quantities easier. ➤ Convert decimal numbers to percentage in order to make comparing of quantities easier. ➤ Convert percentages to fractions or decimals in order to solve real life problems. ➤ Calculate increase or decrease in quantity as percentage in order to examine change in quantity based on real life problems. ➤ Calculate cost and selling price in order to determine profit/loss percentage. ➤ Understand the concept of simple interest in order to interpret word problems. ➤ Make use of percentage in order to calculate simple interest for multiple years. 	<p>Collection of 5 different bills and finding the following quantities: SP, Profit or Loss</p>	

<p>TERM-2 OCT TO MARCH</p>	<p>PT-3 Max M:40 (Weightage 5 m)</p>	<p>October</p>	<p>14</p>	<p>9. RATIONAL NUMBERS</p>	<ul style="list-style-type: none"> ➤ Need for rational numbers ➤ +ve and -ve rational numbers ➤ Rational numbers on number line ➤ Rational numbers in standard form ➤ Comparison of rational numbers ➤ Operations on rational numbers 	<ul style="list-style-type: none"> ➤ Define rational numbers in order to classify a number as a rational number. Represent integers in the form of numerator/denominator where denominator is non-zero in order to define rational numbers. Multiply numerator and denominator by same non-zero integer in order to find equivalent rational numbers. ➤ Define positive and negative rational numbers in order to classify a number as either of them. Construct a number line in order to represent rational numbers on it. Simplify rational number such that there is no common factor between numerator and denominator in order to represent the number in standard form. Determine the distance of a rational number from 0 in order to compare them. ➤ Calculate and find rational numbers between any 2 rational numbers in order to infer that there are infinite rational numbers between any 2 given rational numbers. Apply the rules of rational numbers operations in order to simplify arithmetic operations. 	<p>To add/subtract two rational numbers using Graph sheet.</p>	<p>30% of Term-2</p>
		<p>November</p>	<p>22</p>	<p>10. PRACTICAL GEOMETRY</p>	<p>Construction of line parallel to a given line through a point not on the line</p> <ul style="list-style-type: none"> ➤ Construction of triangles ➤ SSS ➤ SAS ➤ ASA ➤ RHS criteria 	<ul style="list-style-type: none"> ➤ Use a ruler and compass in order to construct a line parallel to another line through a point not on the line. List and execute steps in order to construct a triangle given the measures of its three sides. ➤ List and execute steps in order to construct a triangle when any of its two lengths and an angle between them is given. List and execute steps in order to construct a triangle when any of its two angles and the side included between them is given. ➤ List and execute steps in order to construct a right-angled triangle when the length of one leg and its hypotenuse are given. Examine the given information in order to determine if construction of a triangle from it is possible or not. 	<p>To examine the possibility of construction of a triangle with the given parameters.</p>	

				<p>11. PERIMETER AND AREA</p> <ul style="list-style-type: none"> ➤ Square and rectangles ➤ Triangles and parts of rectangles ➤ Perimeter of square rectangle and triangle ➤ Area ➤ Area of rectangle, square and triangle ➤ Circumference of a circle ➤ Area of a circle 	<ul style="list-style-type: none"> ➤ Describe the area and perimeter of plane figures in order to find the same for square and rectangle. ➤ Develop and apply a formula in order to determine the area of triangle as half of the area of a rectangle. ➤ Use unit square grid sheets in order to find the perimeter and estimate the area of parallelogram. ➤ Develop and apply a formula in order to determine the area of a parallelogram. ➤ Compare the area of a triangle and its corresponding parallelogram in order to discuss their relation. ➤ Use direct or indirect measurements in order to describe the relationships among radius, diameter, and circumference of circles. Investigate different circumference of circles and compare them with their respective diameter in order to relate circumference to Pi. ➤ Use direct or indirect methods to find the circumference of circle, semicircle. ➤ Develop and apply the formula in order to find the area of a circle and semicircle. ➤ Examine area and perimeter of different ➤ figures in order to find solution for real life problems 	<ul style="list-style-type: none"> ➤ To derive the formula to find area of a circle. 	
--	--	--	--	--	--	---	--

		January	22	14. SYMMETRY <ul style="list-style-type: none"> ➤ Introduction ➤ Line symmetry for regular polygons ➤ Rotational symmetry 	<ul style="list-style-type: none"> ➤ Determine lines of symmetry for the given figures in order to classify them on the basis of no. of lines of symmetry. ➤ Examine regular polygons in order to determine their lines of symmetry. ➤ Complete the mirror reflection of the given figures along the mirror line (i.e., the line of symmetry) in order to identify the figure. ➤ Examine the given figure in order to determine its angle of rotation. ➤ Examine the given figure in order to determine its order of rotation. ➤ Examine the given figures in order to identify figures which have both line symmetry as well as rotational symmetry 	<ul style="list-style-type: none"> ➤ To find the order of rotational symmetry of a given figure. 	
				15. VISUALISING SOLID SHAPES <ul style="list-style-type: none"> ➤ Introduction ➤ Plane figures and solid shapes ➤ Cross-section of 3d shapes ➤ Nets for building 3d shapes ➤ Viewing different sections of a solid 	<ul style="list-style-type: none"> ➤ Examine different solid shapes in order to identify and count their number of faces, edges and vertices. ➤ Examine oblique sketches in order to visualize all the faces of a solid shape. ➤ Draw 3D objects in 2D in order to visualize solid objects from different perspectives. ➤ Examine cross sections of different solid shapes in order to interpret and visualize different planes. ➤ Examine the different figures formed by changing the angle of shadows formed in order to visualize solid figures. 	<ul style="list-style-type: none"> ➤ Making 3 D shapes using nets. 	
11		February	22	Revision			
12	ANNUAL EXAMINATION Max M:80 (Weightage 80 m)	March	23	Annual Exam and Results			20% of Term-1 + Entire syllabus of Term-2

SPLITUP SYLLABUS-2023						
			CLASS-VII			
			SUBJECT-SST			
TEXTBOOK HISTORY; NCERT OUR PASTS – II : GEOGRAPHY NCERT OUR ENVIRONMENT; CIVICS NCERT SOCIAL AND POLITICAL LIFE-II						
TERM-1	ASSESSMENT	MONTH	CHAPTER & Sub Topics	LEARNING OBJECTIVES	ACTIVITIES	SYLLABUS COVERAGE
APRIL to SEPTEMBER	UT-1/PT-1 Max M:40 (Weightage 5m)	APRIL	HISTORY : TRACING CHANGES THROUGH A THOUSAND YEARS New and old Terminologies, Historians and their sources, New and Political Groups , Old and New Religions , Thinking about Time and Historical periods.	Learning about the importance of remains of ancient monuments, weapons, utensils , currencies and other such artefacts together with any written records of the period either in papers , scriptures or simply by way of symbols and signs made on the walls , helped historians in tracing changes over a period of several years.	Iconography on coins (coins making)- Design coins of the early Medieval Period using clay to understand the economic condition of a kingdom.	30%of Term 1
			HISTORY : NEW KING AND KINGDOMS The Emergence of New Kingdoms, Administration in the Kingdoms, Prashastis and Land Grants, Warfare for Wealth, A Closer Look: The Cholas, From Uraiyur to Thanjavur, Splendid	Analysis different types of taxes, land grants, Prashasthi . Understand about the Cholas rule and their Administration.	Discuss the developmental achievements of Cholas and collect pictures of temples	

			Temples and Bronze Sculptures, Agriculture and Irrigation, Administration of the Empire.		and sculptures to show their success on a chart paper.	
			GEOGRAPHY: ENVIRONMENT Components of the Environment, Biotic and Abiotic, Natural Environment, Human made Environment, Human Environment, Atmosphere, Ecosystem.	Analysis the relationship between natural environment and human habitation. Appreciate the needs of transport and communication for the development of the community and make the world as global society .Explain about Biotic and Abiotic components of the earth and its Relationship.	Design a poster on the theme odd and even in Delhi on A4 sheet incorporating appropriate content heading and slogan.(Pollution Control)	
			CIVICS: ON EQUALITY Equal Right to Vote, Universal Adult Franchise, Other Kinds of Equality, Recognising Dignity, Equality in Indian Democracy, Issues of Equality in Other Democracies , Challenge of Democracy.	Understand the importance of the idea of equality in democratic country. Appreciate a representative form of government and have the knowledge of Indian Constitution.	Mock Election. (Adult Franchise Method)	
		MAY	HISTORY:THE DELHI SULTANS Finding Out About the Delhi Sultans ,From Garrison Town to Empire: Expansion of Delhi Sultanate, A Closer look :	Explain the reason for the establishment of Delhi Sultanate rule in India. Identify the	Make a Timeline of Delhi Sultans and explain only one	

	PT2 MM:80 (Weightage 80m)		Administration and Consolidation Under the Khaljis and Tughlaqs, Sultanates of the Fifteenth and Sixteenth Centuries.	area ruled by Delhi Sultanate. State the various social political and economic aspects of the Sultanate period.	special feature of the rulers for the expansion of their territory in India.	Annual Syllabus
			GEOGRAPHY : INSIDE OUR EARTH Interior of the Earth-Crust, Mantle and Core, Rock and Minerals, Types of Rocks- Sedimentary Rocks , Metamorphic Rocks and Igneous Rocks , Rock cycle.	Evaluate the structure of earth and its layers (crust ,mantle and core) . Explain the different types of rocks .Describe the formation of rocks with the help of diagram.	Playing a rock game where in children have to match the properties of different rocks written on slips by teacher and make a record of it on a response table in their notebook.	
		JULY	CIVICS:ROLE OF THE GOVERNMENT IN HEALTH What is health, Healthcare in India, Public and private healthcare services, Healthcare and equality: Is adequate healthcare available to all?, What can be done? The Kerala experience, The Costa Rican approach.	Explain about the role of the government in taking decisions to improve the health of the people, Healthcare system in India and types of healthcare facilities available in India (Private and Public). Analyse the work of government through the case study of	Role play on the health care services provided by the government and private hospital.	

30+20=
50%
Of

			Kerala and Costa Rica.	
		HISTORY:THE MUGHAL EMPIRE Who Were The Mughals ? Mughal Military Campaigns, Mughals Traditions of Succession , Mughals Relations With Other Rulers, Mansabdars and Jagirdars, Zabt and Zamindars, A Closer Look: Akbar's Policies, The Mughal Empires In The 17th Century And After.	Describe the reason for the establishment of Mughal Empire .Explain the qualities that made Babur and Akbar the Great successful. Explain the fall of the Mughal Empire.	Creating a scroll- Making a scroll of Akbar Nama presenting the doctrines of Din -i- Ilahi and Sulh-i- kul creatively.
		GEOGRAPHY:OUR CHANGING EARTH The Changing Environment on Earth and Its Effects, Earth Movements- Endogenic and Exogenic forces, A Volcano , Earthquakes, Case Study on Earthquake, Earthquake preparedness , Major Landforms: Work of River, Work of Sea Waves ,Work of Ice, Work of Wind.	Understand about the endogenic and Exogenic forces. Analysis the different work of River, Wind, Sea Waves and Ice.	Activity- Volcano Making Model- Make model of volcano using clay and comprehend its components also.
		CIVICS : HOW THE STATE GOVERNMENTWORKS ? Who is an MLA? A debate in the Legislative Assembly ,Working of the government.	Evaluate the nature of decision making within the State Government, Provide knowledge of the different levels of government and provision of services.	Collage making- Prepare a collage of newspaper headlines by comprehending the role of State government in catering the current situations.

		<p style="text-align: center;">AUG UST</p>	<p>GEOGRAPHY: AIR Atmosphere ,Composition of the Atmosphere , Structure of the Atmosphere-Troposphere, Stratosphere, Mesosphere ,Thermosphere and Exosphere, Weather and Climate ,Temperature, Air Pressure, Wind and its Types., Moisture and Types of Rainfall.</p>	<p>Demonstrate the atmosphere with its layers. Differentiate between Climate and weather .Explain about the different types of wind and rainfall with the help of diagram.</p>	<p>Map pointing- Locate different pressure belts on the World Physical map to examine the relationship between temperature and pressure belt of an area.</p>	
			<p>HISTORY: RULERS AND BUILDINGS Engineering Skills and Construction ,Buildings, Temples ,Mosques ,and Tanks, Why were the Temples destroyed? Gardens, Tombs, and Forts, Region and Empire</p>	<p>Appreciate the range of materials, skills ,and styles used to build water works ,places of worship, palaces and havelis, forts ,gardens.</p>	<p>PROJECT WORK(Internal assessment) Model making : Make a Model of temple / Mosque / any other religious place during the time of Mughal rulers.</p>	
			<p>GEOGRAPHY:WATER Water Cycle, Distribution of Water Bodies, Salinity of Ocean Water ,Tsunami, Ocean Circulation-Waves, Tides and Ocean Currents.</p>	<p>Knowledge about the water cycle and importance of water. Distribution of water bodies and the movement of Ocean water through waves, tides and ocean</p>	<p>Map work –Locate Ocean Currents on the Physical map of the World .Diagram : Neap Tides and Spring</p>	

				currents .Reason for occurrence of tides and ocean currents.	Tides	
			CIVICS: GROWING UP BOYS AND GIRLS Growing up in Samoa in the 1920s ,Growing up male in Madhya Pradesh in the 1960s, Valuing housework, Lives of domestic workers, Women’s work and equality.	Knowledge towards gender stereotype and discrimination. Analysis the gender inequality happening in their day to day practices.	PROJECT: FOR INTERNAL ASSESSMENT Debate on gender equality in India.	
TERM-2		SEPT EMB ER	Revision			
		OCT OBE R	CIVICS : WOMEN CHANGE THE WORLD Who does the work? Fewer opportunities and rigid expectations, Learning for change- Pandita Ramabai, Rashsundari and Rokeya Sakhawat Hossain ,Schooling and education today, Women’s movement ,Campaigning ,Raising Awareness, Protesting, Showing Solidarity.	Highlights the Gender inequality present in the society. Explain, how women got opportunities of being educated in difficult situations in the past .Explain about women movements to protect their rights.	Speech on great personalities which empowers the women's equality in society	
			HISTORY : TOWNS, TRADERS AND CRAFTS PERSON Administrative Centers, Temple Towns and Pilgrimage Centres , A Network of Small Towns ,Traders Big and Small, Crafts in Towns ,A Closer Look : Hampi, Masulipatnam and Surat.	Knowledge about how towns developed in the past .Appreciate about the various craftsmen and traders. Trace the growth and establishment	Map Work: On the Political Map of India, mark the places which where the most important	

				of towns.	centres of religion during the medieval period. Collect pictures of the temples or mosques for which these places are famous and paste along with the map on a chart.	
--	--	--	--	------------------	--	--

PT-3 MM:40 (Weightage 5m)		CIVICS: UNDERSTANDING MEDIA Media and its type, Media and Technology, Media and Money ,Media and Democracy, Censorship, Setting Agendas ,Social advertising.	Define the terms Media and Democracy. Understand the importance of media in a democratic country .appraise the importance of media in controlling the government. Fourthly, Understand what will happen if the media is biased or corrupt.	Accordion book- Gather pictures and information on various types of media and compile the same in the accordion book.	30% of Term 2
	N O V E M B E R	GEOGRAPHY: NATURAL VEGETATION AND WILDLIFE Natural Vegetation, factors of Natural vegetation, Types of Natural Vegetation- Forests, Grasslands and Shrubs, Types of Forests- Tropical Evergreen Forests, Tropical Deciduous Forests ,Temperate Evergreen Forests, Temperate Deciduous Forests ,Mediterranean Vegetation, Coniferous Forests ,Grasslands- Tropical Grasslands, Temperate Grasslands and Thorny Bushes.	Define Natural vegetation and wildlife , Categories of vegetation and explain about different types of forest and grasslands.	Flip Class: Impact of deforestation on the environment and the urgent need to protect and conserve our flora and fauna.	
	O C T O B E R	CIVICS: MARKETS AROUND US Weekly market, Shops in the neighborhood, Shopping complexes and malls, Chain of markets ,Markets everywhere, Markets and equality.	Differentiate between different types of market. Understand the importance of market around us. Thirdly,	Scrap book- compile the pictures of different markets they come across in their daily life.
